Paving the way for predictive diagnostics and personalized ...

The medical field has come a long way in diagnosis and treatment of diseases. With new diseases on the rise globally, researchers and medics have felt the need to explore personalized and predictive medicine. Predictive medicine is revolutionary because it can predict any on coming disease in an individual and help to take actions accordingly.

Personalized and Predictive Medicine, a Revolutionary Step

A predictive and personalized approach ranges from identifying individuals in a suboptimal health condition followed by cost-effective targeted prevention, to palliative care evolving from “just end of life” care to treatment algorithms tailored to the person with optimized individual outcomes. Multiprofessional expertise is essential.
